SOFTWARE

Program it with PRG10 programming (optional) cod. C974.01

CONFORMITY

Complying to the RE-D 2014/53/UE

CT590 S is the new dual band Midland amateur radio. CT590 S is easy to use, ideal for those who need a "basic" device but at the same time with several functions and features to be complete.

Robustness and reliability are guaranteed by the aluminum chassis. CT590 S operates on the 144-146MHz and UHF 430-440MHz VHF frequency bands and has 128 storable channels. The high performance guarantees excellent communications even on long distances, thanks also to the 1750Hz tone, to access repeater bridges.

CT590 S has a torch, an 87.5-108MHz FM radio receiver and 50 CTCSS tones and 208 DCS codes that allow you to create "sub-channels" to communicate with a small group of people.

CT590 S also allows you to customize your ID (ANI-ID) and to be able to send it during transmission (PTT-ID).

The LCD display has 3 different color backlighting to choose from, to be associated with the corresponding use (reception, transmission, etc.).

The radio can be programmed with the optional software, PRG-10, to set and customize several functions, as the number of channels, frequency, etc.

PACKAGING AND CODES

Radio, 1500 mAh 7.4V Li-Ion battery pack, desktop fast charger, wall adapter, antenna, belt clip.
