SOFTWARE

Compatible with the PRG-10 programming software code C974.01

COMPLIANCE

Device in compliance with the RE-D 2014/53/EU regulation

Cod. C1107.04

The G10 Pro walkie-talkie is suitable for use on construction sites and on the road, because it is effective and sturdy, with a package of essential functions that ensure rapid communications.

For example, with the "Scan" function, which can be unlocked via the (optional) programmer, the radio constantly checks the channels to find conversations in progress and set the radio to the used channel.

32 total channels – 16 more than the previous model - take advantage of the extended frequency band (446.00625 – 446.19375MHz), with 50 CTCSS and 116 DCS tones, normal and inverted, signalled by the voice indication.

The lithium battery guarantees long use and is automatically managed by the Auto Power Save function for efficient consumption and energy saving.

The clean design is completed with the belt clip, inside the package, which can be mounted immediately.

G10 Pro has a wide range of accessories: the multi-station multiple charger (6 radios), different types of microphones (earphones, with or without PTT, pneumatic, to name just the main ones) with Kenwood 2-pin socket.

PACKAGING

Transceiver with belt clip, Li-Ion battery pack, desktop charger, wall adaptor
